Before the Internet became widely known as a global tool for terrorists, one perceptive U.S. citizen recognized its ominous potential. Armed with clear evidence of computer espionage, he began a highly personal quest to expose a hidden network of spies that threatened national security. But would the authorities back him up? Cliff Stoll's dramatic firsthand account is "a computer-age detective story, instantly fascinating [and] astonishingly gripping" (Smithsonian). Cliff Stoll was an astronomer turned systems manager at Lawrence Berkeley Lab when a 75-cent accounting error alerted him to the presence of an unauthorized user on his system. The hacker's code name was "Hunter"—a mysterious invader who managed to break into U.S. computer systems and steal sensitive military and security information. Stoll began a one-man hunt of his own: spying on the spy. It was a dangerous game of deception, broken codes, satellites, and missile bases—a one-man sting operation that finally gained the attention of the CIA . . . and ultimately trapped an international spy ring fueled by cash, cocaine, and the KGB.

content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.

A most untraditional love story, this is the celebrated tale of Henry DeTamble, a dashing, adventuresome librarian who inadvertently travels through time, and Clare Abshire, an artist whose life takes a natural sequential course. Henry and Clare's passionate affair endures across a sea of time and captures them in an impossibly romantic trap that tests the strength of fate and basks in the bonds of love. "Niffenegger's inventive and poignant writing is well worth a trip" (Entertainment Weekly).

Appearances - The Art of Class is an examination of the subtle refinements which make one an elitist.

China is urbanizing at an unprecedented speed. Filmmakers, artists, musicians, and writers all try to come to terms with the changes of their city. How is the Chinese city-as-spectacle, visualised and thus imagined and reimagined, if not contested, in art and popular culture? What are the possible escape routes from a completely commodified cityscape? How to realign artistic expressions of the spectacle with everyday practices? The imaginations of the Chinese city in art and popular culture that this book explores are not taken as merely mirroring or reflecting reality, on the contrary, they are part and parcel of the construction, destruction and deconstruction of that reality. As such, these imaginations are enmeshed in the social, material and political realities that produce Chinese cityscapes. *Spectacle and the City: Chinese Urbanities in Art and Popular Culture* brings together essays by an interdisciplinary team of experts on Chinese cities, including world-renowned scholars like Ackbar Abbas and Chua Beng Huat, as well as leading cultural critics like Ou Ning. Aiming to steer away from an exclusive focus on Mainland China, the adjective Chinese has a cultural meaning and includes places like Singapore and Hong Kong.
