~~Angle Of Repose~~  
The angle of repose, or critical angle of repose, of a granular material is the steepest angle of descent or dip relative to the horizontal plane to which a material can be piled without slumping. At this angle, the material on the slope face is on the verge of sliding. The angle of repose can range from  $0^\circ$  to  $90^\circ$ .

steepest angle at which a sloping surface formed of a particular loose material is stable”. A fitting enough title for a story that had a lot to do with mining and engineering, but in Stegner’s capable hands it comes to mean much more.

### ~~Angle of Repose by Wallace Stegner – Goodreads~~

The second half of the book explained what angle of repose meant in the context: it’s a metaphor for two people who remain together although they having nothing in common. The story is about two married peopel whose lives were like two horizontal lines that never intersected; but, despite having nothing in common, they stayed together by remaining kind and respectful to each other.

The "Angle of Repose" was on most of these lists and in my opinion it should be on all of them. Before I begin my review, let me state my bias. There is a huge difference between a book and a novel. A book is (generally) a fast paced and entertaining story. It may deal with geopolitics, romance, horror, murder, or any other topic you can think of.

?Introduction by Terry Tempest Williams Afterword by T. H. Watkins ?Called a “magnificently crafted story . . . brimming with wisdom” by Howard Frank Mosher in The Washington Post Book World, *Crossing to Safety* has, since its publication in 1987, established itself as one of the greatest and most cherished American novels of the twentieth century. Tracing the lives, loves, and aspirations of two couples who move between Vermont and Wisconsin, it is a work of quiet majesty, deep compassion, and powerful insight into the alchemy of friendship and marriage.

According to modern historians, it has been a tourist destination since 30 B.C., and the interest of foreign travelers has hardly waned since. The photographers presented here are no exception; each knits past with present while validating their own discovery of Egypt's ancient monuments. From the pyramids of Giza to the Valley of the Kings, Lynn Davis' and Linda Connor's silver gelatin prints echo nineteenth-century photographers' documentations of their North African travels. Strewn with scaffolding, piecemeal temples and shattered sculptures of pharaohs, Tom Van Eynde's Egypt reveals the dramatic detail of its ruins. Harsh and colorful, Richard Misrach's landscapes juxtapose contemporary culture with ancient desert monuments, framing the Pyramids with tour buses, downtown Cairo, and cement housing complexes.

Crossing to Safety, his National Book Award–winning novel A Penguin Classic Joe Allston is a retired literary agent who is, in his own words, "just killing time until time gets around to killing me." His parents and his only son are long dead, leaving him with neither ancestors nor descendants, tradition nor ties. His job, trafficking the talent of others, had not been his choice. He passes through life as a spectator. A postcard from a friend causes Allston to return to the journals of a trip he had taken years before, a journey to his mother's birthplace where he'd sought a link with the past. The memories of that trip, both grotesque and poignant, move through layers of time and meaning, and reveal that Joe Allston isn't quite spectator enough.

Joe Allston, the retired literary agent of Stegner's National Book Award-winning novel, *The Spectator Bird*, returns in this disquieting and keenly observed novel. Scarred by the senseless death of their son and baffled by the engulfing chaos of the 1960s, Allston and his wife, Ruth, have left the coast for a California retreat. And although their new home looks like Eden, it also has serpents: Jim Peck, a messianic exponent of drugs, yoga, and sex; and Marian Catlin, an attractive young woman whose otherworldly innocence is far more appealing—and far more dangerous.
