REVIEW: ' Blind Faith ' by Ben Elton | Buried Under Books

This is the tongue and cheek world created by Ben Elton in, " Blind Faith. " There are obvious over tones of Orwell ' s " 1984, " Huxley ' s " A Brave New World, " and any number of other dystopian/government run amuck stories, but Elton manages to terrify and amuse at the same time by mixing in some very familiar modern day staples.

Imagine a world where everyone knows everything about everybody. Where 'sharing' is valued above all, and privacy is considered a dangerous perversion. Trafford wouldn't call himself a rebel, but he's daring to be different, to stand out from the crowd. In his own small ways, he wants to push against the system. But in this world, uniformity is everything. And even tiny defiances won't go unnoticed. Ben Elton's dark, savagely comic novel imagines a post-apocalyptic society where religious intolerance combines with a sex-obsessed, utterly egocentric culture. Reveals the truth behind the murder of Maria Marshall, the role played by her husband, Rob, and the effect of the events upon their three sons, in a story marked by gambling, drugs, debt, and infidelity.

Chart Throb. The ultimate pop quest. Ninety five thousand hopefuls. Three judges. Just one winner. And that's Calvin Simms, the genius behind the show. Calvin always wins because Calvin writes the rules. But this year, as he sits smugly in judgement upon the mingers, clingers and blingers whom he has pre-selected in his carefully scripted 'search' for a star, he has no idea that the rules are changing. The 'real' is about to be put back into 'reality' television and Calvin and his fellow judges (the nation's favourite mum and the other bloke) are about to become ex-factors themselves. Ben Elton, author of Popcorn and Dead Famous returns to blistering comic satire with a savagely hilarious deconstruction of the world of modern television talent shows. Chart Throb. One winner. A whole bunch of losers.

The war on drugs has been lost but for want of the courage to face the fact that the whole world is rapidly becoming one vast criminal network. From pop stars and princes to crack whores and street kids. From the Groucho Club toilets to the poppy fields of Afghanistan, we are all partners in crime. HIGH SOCIETY is a story or rather a collection of interconnected stories that takes the reader on a hilarious, heart breaking and terrifying journey through the kaleidoscope world that the law has created and from which the law offers no protection.

Why are we all so hostile? So quick to take offence? Truly we are living in the age of outrage. A series of apparently random murders draws amiable, old-school Detective Mick Matlock into a world of sex, politics, reality TV and a bewildering kaleidoscope of opposing identity groups. Lost in a blizzard of hashtags, his already complex investigation is further impeded by the fact that he simply doesn't 'get' a single thing about anything anymore. Meanwhile, each day another public figure confesses to having 'misspoken' and prostrates themselves before the judgement of Twitter. Begging for forgiveness, assuring the public "that is not who I am". But if nobody is who they are anymore - then who the f##k are we? Ben Elton returns with a blistering satire of the world as it fractures around us. Get ready for a roller-coaster thriller, where nothing - and no one - is off limits.

"Wry, fast and fiendishly clever" (The Times) One house. Ten contestants. Thirty cameras. Forty microphones. Yet again the public gorges its voyeuristic appetite as another group of unknown and unremarkable people submit themselves to the brutal exposure of the televised real-life soap opera, House Arrest. Everybody knows the rules: total strangers are forced to live together while the rest of the country watches them do it. Who will crack first? Who will have sex with whom? Who will the public love and who will they hate? All the usual questions. And then, suddenly, there are some new ones. Who is the murderer? How did he or she manage to kill under the constant gaze of the thirty television cameras? Why did they do it? And who will be next?

Stark is a secret consortium with more money than God, and the social conscience of a dog on a croquet lawn. What's more, it knows the Earth is dying. Deep in Western Australia where the Aboriginals used to milk the trees, a planet-sized plot is taking shape. Some green freaks pick up the scent: a pommie poseur; a brain-fried Vietnam vet; Aboriginals who have lost their land...not much against a conspiracy that controls society. But EcoAction isn't in society: it just lives in the same place, along with the cockroaches. If you're facing the richest and most disgusting scheme in history, you have to do more than stick up two fingers and say 'peace'.

Gridlock Too many cars and not enough space equals gridlock. Gridlock is when a city dies. Killed in the name of freedom. Killed in the name of oil and steel. Choked on carbon monoxide and strangled with a pair of fluffy dice. How did it come to this? How did the ultimate freedom machine end up paralysing us all? How did we end up driving to our own funeral, in somebody else's gravy train? Deborah and Geoffrey know, but they have transport problems of their own, and anyway, whoever it was that murdered the city can just as easily murder them. If you had one chance to change history...Where would you go? What would you do? Who would you kill? In *Time and Time Again*, international best-selling author Ben Elton takes readers on a thrilling journey through early 20th-Century Europe. It's the first of June 1914 and Hugh Stanton, ex-soldier and celebrated adventurer is quite literally the loneliest man on earth. No one he has ever known or loved has been born yet. Perhaps now they never will be. Stanton knows that a great and terrible war is coming. A collective suicidal madness that will destroy European civilization and bring misery to millions in the century to come. He knows this because, for him, that century is already history. Somehow he must change that history. He must prevent the war. A war that will begin with a single bullet. But can a single bullet truly corrupt an entire century? And, if so, could another single bullet save it?

'A work of formidable imaginative scope' *Daily Telegraph* The first casualty when war comes is truth . . . Flanders, June 1917: a British officer and celebrated poet, is shot dead. He is killed not by German fire, but while recuperating from shell shock well behind the lines. A young English soldier is arrested and, although he protests his innocence, charged with his murder. Douglas Kingsley is a conscientious objector, previously a detective with the London police, now imprisoned for his beliefs. He is released and sent to France in order to secure a conviction. Forced to conduct his investigations amidst the hell of The Third Battle of Ypres, Kingsley soon discovers that both the evidence and the witnesses he needs are quite literally disappearing into the mud that surrounds him. Ben Elton's tenth novel is a gut-wrenching historical drama which explores some fundamental questions: What is murder? What is justice in the face of unimaginable daily slaughter? And where is the honour in saving a man from the gallows if he is only to be returned to die in a suicidal battle?
