Prepare for career success with this trusted introduction to the world of health insurance billing and the dynamic, growing field of health information management. A GUIDE TO HEALTH INSURANCE BILLING, Fourth Edition, provides a thorough, practical overview of key principles and current practices, from patient registration to claims submission. Now updated to reflect the latest trends, technology, terminology, legal and regulatory guidelines, and coding systems—including ICD-10—the new edition also features a dynamic full-color layout. The text also includes abundant exercises, examples, case studies, and activities focused on real-world applications, including step-by-step procedures for generating, processing, and submitting health insurance claims to commercial, private, and government insurance programs. An access code for SimClaim interactive online billing software is also provided; this program puts billing skills to the test with case studies that require form completion. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

This book is designed to meet the needs of both dental students and dentists by providing succinct and quickly retrievable answers to common dental questions. Students will find both that it clearly presents the particulars which should be familiar to every dentist and that it enables them to see the big picture and contextualize information introduced to them in the future. Practicing dentists, on the other hand, will employ the book as a daily reference to source information on important topics, materials, techniques, and conditions. The book is neither discipline nor specialty specific. The first part is wide ranging and covers the essentials of dental practice while the second part addresses individual specialties and the third is devoted to emergency dental treatment. Whether as a handy resource in the student s backpack or as a readily available tool on the office desk, this reference manual fills an important gap in the dental literature.
