Relive the first one hundred years of Germany's best two- and four-wheeled rides. Established in 1916, BMW is one of the auto and motorcycle industry's oldest and most-respected car and motorcycle manufacturers. Over the past century, the company went through myriad developments. The BMW Century chronicles this remarkable transportation company through images of the cars and motorcycles it manufactured, from the 1923 R32 motorcycle to sleek electric cars of today. This handsome volume is filled with images, history, and in-depth looks at the incredible machines BMW created year after year. The BMW Century showcases how the company's new visionary team systematically rebuilt BMW in the post-World War II years into the spectacular success we know today - that is, a company with sales projected to be upwards of two million cars annually by 2016, led by its 3-series, the best-selling luxury-performance car in the world. BMW's motorcycle division is no less legendary. It began with the 1923 avant-garde R32, which featured a 180-degree, horizontally opposed twin, the engine configuration that would become BMW's hallmark. Along the way, BMW would use that configuration to power groundbreaking machines like the R90S, R100RS, and R80GS. Beginning in 1983, they would add three- and four-cylinder machines to their offerings, culminating in today's spectacular S1000RR sport bike. From the pre-war motorcycles to the iconic R-series twins of the 1970s and 80s to the mighty M-series cars and superbikes of today, The BMW Century offers a full review of German engineering at its finest. The book is illustrated with hundreds of historic, contemporary, and racing photographs - many sourced from BMW's archives - and detailed text relating the BMW's full history. This is the one volume no BMW aficionado can be without.

Singapore's best homegrown car magazine, with an editorial dream team driving it. We fuel the need for

speed!

Oil and coal have built our civilisation, created our wealth and enriched the lives of billions. Yet their rising costs to our security, economy, health and environment are starting to outweigh their benefits. Moreover, the tipping point where alternatives work better and compete purely on cost is not decades in the future - it is here and now. And that tipping point has become the fulcrum of economic transformation. In *Reinventing Fire*, Amory Lovins and the Rocky Mountain Institute offer a new vision to revitalise business models and win the clean energy race - not forced by public policy but led by business for long-term advantage. This independent and rigorous account offers market-based solutions integrating transportation, buildings, industry and electricity. It maps pathways for running a 158%-bigger US economy in 2050 but needing no oil, no coal, no nuclear energy, one-third less natural gas and no new inventions. This transition would cost \$5 trillion less than business-as-usual - without counting fossil fuels' huge hidden costs. Whether you care most about profits and jobs, or national security, or environmental stewardship, climate, and health, *Reinventing Fire* makes sense. It's a story of astounding opportunities for creating the new energy era. -- Publisher description.

Seminar paper from the year 2007 in the subject Business economics - Marketing, Corporate Communication, CRM, Market Research, Social Media, grade: A, University of Bradford, course: MBA, 50 entries in the bibliography, language: English, abstract: Terms of Reference This marketing plan for the BMW 1-series aims to outline and analyse the market environment in Germany. Also, an evaluation of the strategic and operational orientation as well as the strength and weaknesses of the product should be given. Based on this, recommendations for the future direction and implementation of the marketing-mix will be given. Executive Summary In the competitive compact segment (short: C-segment) with increasingly demanding customers, BMW with its newly launched product clearly builds on its premium image as a sports car manufacturer. Although this is generally a good strategy, certain parts of the marketing mix need to be adjusted. Especially the high price of the product in comparison with its competitors is a potential problem. The following suggestions can be given to successfully built up a sustainable leading position in this segment, which is very important in terms of Customer-Lifetime-Value (CLV): - Reduction of quality problems - New technology development through increased R&D measures - Increased promotional measures focused on the target group - Strengthening of the dealer relationship - Development of new distribution channels

The dangers of wealth and beauty emerge from the shadows in the latest *Only in Tokyo Mystery...* English translator Yumi Hata often feels ill at ease in Tokyo's traditional world, but she has never been seduced by its' seedy underbelly--a place populated by beautiful, desperate men and women and the wealthy patrons that will pay anything to command their time. But fear for her friend Coco draws her into Club Nova, where Yumi is unprepared to face the temptations of professional boytoys, towers of champagne and Tokyo Metropolitan Police Detective Kenji. In Kabuki-cho to investigate a young hostess's death, the last person Kenji expects to find there is Yumi. Kenji knows that his life-long crush is about to marry into one of the richest and oldest families in Japan, and that he should keep his distance. But Yumi can get into places that Kenji can't, and she soon agrees to help him with another murder investigation. Their journey into the elite clubs reveals the darker side of Tokyo, and soon Yumi and Kenji find themselves in a dangerous game of cat and mouse with a killer who is ready to strike again...
