Modern Chemistry, Chapter 10. States of Matter. Kinetic-Molecular Theory The kinetic-molecular theory of matter is based on the idea that particles of matter are always in motion and this motion has consequences that affect its physical properties. Kinetic-Molecular Theory of Gases 1- Gases consist of large numbers of tiny particles that are far apart relative to their size. 2- Collisions between gas particles and between particles and their container walls are elastic.

Modern Chemistry Chapter 10 States of Matter

Almost all substances can be classified into three states of matter | solids, liquids and gases. Each state has different properties. Heating and cooling a substance can cause it to change state.
