forces in public lower secondary school admissions in the context of China's social transformation from a profit-driven society to a more equitable society, and elucidates the power relationships among stakeholders in public school admissions by analysing their interplay in the process. More importantly, it exposes how current socio-economic, institutional and educational systems are shaping the engagement of stakeholders in the public school admissions process. It also presents some on-going projects intended to yield new policies and practices for more equitable public secondary education in China

phenomena usually focus on the syntax as an explanatory tool. This book argues that a large majority of such argument structure phenomena are better accounted for by recourse to enriched representations in lexical semantics. Drawing insights from conceptual semantics, cognitive semantics, Generative Lexicon, construction grammar and formal syntax, this book constitutes the first attempt at a comprehensive account of lexical semantic issues in Mandarin Chinese.
