Underscores the unique health needs of children at different ages and developmental stages This is the only text/reference book to deliver the specialized knowledge and skills needed to accurately assess children during health and illness. Comprehensive and detailed, it emphasizes the unique anatomic and physiologic differences among infants, children, and adults. The third edition features updated clinical practice guidelines, clinical decision-making, formulating differential diagnoses, and evidence-based practice. It newly addresses toxic stress and trauma-informed care and child witnesses to violent acts. Additionally, the book provides several new features facilitating quick access to key information along with new instructor and student resources. Using a body system that highlights developmental and cultural considerations, the text examines the physical and psychosocial principles of growth and development with a focus on health promotion and wellness. Especially useful features include a detailed chapter on helpful communication techniques when assessing children of various ages and developmental levels, a chapter on the assessment of child abuse and neglect, over 280 photos and charts depicting a variety of commonly encountered pediatric findings, and sample medical record documentation in each chapter. New to the Third Edition: Now in full-color! Now includes NEW instructor resources (Power Points, Test Bank, 4-color Image Bank) Updated clinical practice guidelines Clinical decision making, formulating differential diagnoses, and evidence-based practice Immigrant and refugee health Toxic stress and trauma-informed care Child witnesses to violent acts Content outline at the beginning of each chapter Call-out boxes summarizing key information Summary boxes on essential areas of physical exams Key Features: Focuses exclusively on the health history and assessment of infants, children, and adolescents Describes the unique anatomic and physiologic differences among infants, children, and adults Provides comprehensive and in-depth information for APN students and new practitioners Addresses family, developmental, nutritional, and child mistreatment assessment Includes clinical practice guidelines for common medical conditions Incorporates up-to-date screening and health promotion guidelines

Advanced Pediatric Assessment provides a detailed and comprehensive approach to obtaining the history and physical examination of children. It addresses the unique anatomic and physiologic differences between infants, children and adults so that PNPs, FNPs, and other practitioners can provide an accurate assessment during health and illness. Using a body system framework that highlights developmental and cultural considerations, the book emphasizes the physical and psychosocial principles of growth and development. Advanced Pediatric Assessment carries increased relevance today, with a focus on health promotion and wellness.

Now in its second edition, Advanced Pediatric Assessment is an in-depth, current guide to pediatric-focused assessment, addressing the unique anatomic and physiological differences among infants, children, and adults as they bear upon pediatric assessment. The second edition is updated to reflect recent advances in understanding of pediatric assessment for PNPs, FNPs, and other practitioners, as well as students enrolled in these advance practice educational programs. This includes a new chapter on the integration of pediatric health history and physical assessment, a Notable Clinical Findings section addressing abnormalities and their clinical significance at the end of each assessment chapter, updated clinical practice guidelines for common medical conditions, updated screening and health promotion guidelines, and summaries in each chapter. Based on a body-system framework, which highlights developmental and cultural considerations, the guide emphasizes the physical and psychosocial principles of growth and development, with a focus on health promotion and wellness. Useful features include a detailed chapter on appropriate communication techniques to be used when assessing children of different ages and developmental levels and chapters on assessment of child abuse and neglect and cultural considerations during assessment. The text presents nearly 300 photos and helpful tables and boxes depicting a variety of commonly encountered pediatric physical findings, and sample medical record documentation in each chapter. NEW TO THE SECOND EDITION: A chapter on the integration of pediatric health history and physical assessment Notable Clinical Findings addressing important abnormalities and their clinical significance in each assessment chapter Updated clinical practice guidelines for common medical conditions Updated screening and health promotion guidelines Accompanying student case study workbook (to be purchased separately) KEY FEATURES: Focuses exclusively on the health history and assessment of infants, children, and adolescents Provides the comprehensive and in-depth information needed by APN students and new practitioners to assess children safely and accurately Includes family, developmental, nutritional, and child mistreatment assessment Addresses cultural competency, including specific information about the assessment of immigrant and refugee children Fosters confidence in APNs new to primary care with children Ellen M. Chiocca, MSN, CPNP, APN, RNC-NIC, is a clinical assistant professor in the School of Nursing at DePaul University. She received a master of science degree in nursing and a postmaster nurse practitioner certificate from Loyola University, Chicago, and a bachelor of science degree in nursing from St. Xavier University. Prior to joining the faculty at DePaul University, she taught at Loyola University, Chicago, from 1991 to 2013. Ms. Chioccal clinical specialty is the nursing of children. Her research focuses on how various forms of violence affect children's health. She is certified in neonatal intensive care nursing and as a pediatric nurse practitioner. In addition to teaching at DePaul, Ms. Chiocca also continues clinical practice as a pediatric nurse practitioner at a community clinic in Chicago. Ms. Chiocca has published more than 25 journal articles and book chapters, and is also a peer reviewer for the journal Neonatal Network. She is currently pursuing a PhD in nursing.

Everything you'll need to learn advanced pediatric assessment in one handy and affordable set! This set delivers the specialized knowledge and skills for pediatric health and illness assessment alongside corresponding critical thinking exercises, case studies, and certification-style exam questions. Comprehensive and detailed, it emphasizes the unique anatomic and physiologic differences among infants, children, and adults. The textbook, now in FOUR-COLOR, newly addresses toxic stress and trauma-informed care and child witnesses to violent acts. Additionally, the book provides several new features facilitating quick access to key information along with NEW instructor and student resources. The study guide delivers a completely new chapter that covers clinical decision-making, formulating differential diagnoses, and evidence-based practice and also provides SOAP notes for the well and abnormal exams. New to the Third Edition: All new FOUR-COLOR presentation in the textbook NEW instructor resources (Power Points, Test Bank, Image Bank) Updated clinical practice guidelines Clinical decision making, formulating differential diagnoses, and evidence-based practice Immigrant and refugee health Toxic stress and trauma-informed care Family, developmental, nutritional, and child mistreatment assessment Key Features: Includes clinical practice guidelines for common medical conditions Incorporates up-to-date screening and health promotion guidelines Provides exam-style essential practice items for the exam Includes Anatomic Labeling Exercises to reinforce required knowledge Delivers essential terminology Offers sample documentation and space for students to practice their own documentation skills.

This useful book is a single source of guidelines required by the editors of 101 nursing journals. The purpose is to provide information about nursing journals for people who are submitting manuscripts for publication.
