For a computer, making 1000 changes is no different from making 10, so there is an economy of scale here with larger documents and problems, and that is where VBA can really shine and save you time. Macros and the Visual Basic Editor

## **Getting started with VBA in Office | Microsoft Docs**

The custom format to show number in thousand

# Read Free Excel Vba Mit Ber 1000 Makros F R Excel 2000 Bis 2010

or in million is simple: #,##0,"k". #,##0,"M". The "k" or "M" is optional, depend on whether you want to show it in the header or in the figure itself. The trick is to put 1 comma and 2 comma at the end of the format setting ( #,##0 ) for "thousand" and "million" respectively.

## **Show number in thousand (k) or in million (M) by using ...**

Format truncates format to 257 characters.. If you try to format a number without specifying format, Format provides functionality similar to the Str function, although it is internationally aware. However, positive numbers formatted as strings using Format don't include a leading space reserved for the sign of the value; those converted using Str retain the leading space.
