A refreshingly practical and honest guide that rewrites the script on ADHD Peter Shankman is a busy guy -- a media entrepreneur who runs several businesses, gives keynote speeches around the world, hosts a popular podcast, runs marathons and Iron Mans, is a licensed skydiver, dabbles in angel investing, and is loving father to his young daughter. Simply put, he always seems to have more than 24 hours in a day. How does he do it? Peter attributes his unusually high energy level and extreme productivity to his ADHD. In *Faster Than Normal*, Shankman shares his hard-won insights and daily hacks for making ADHD a secret weapon for living a full and deeply satisfying life. Both inspiring and practical, the book presents life rules, best practices, and simple but powerful ways to: Harness your creative energy to generate and execute your ideas Direct your hyperfocus to get things done Identify your pitfalls--and avoid them Streamline your daily routine to eliminate distractions Use apps and other tech innovations to free up your time and energy Filled with ingenious hacks and supportive self-care advice, this is the positive, practical book the ADHD community has long needed - and is also an invaluable handbook for anyone who's sick of feeling overwhelmed and wants to drive their faster-than-normal brain at maximum speed...without crashing.

Author and consultant Jennifer Garvey Berger has worked with all types of leaders--from top executives at Google to nonprofit directors who are trying to make a dent in social change. She hears a version of the same plea from every client in nearly every sector around the world: "I know that complexity and uncertainty are testing my instincts, but I don't know which to trust. Is there some way to know what to do when I can't know what's next?" Her newest work is an answer to this plea. Using her background in adult development, complexity theories, and leadership consultancy, Garvey Berger discerns five pernicious and pervasive "mind traps" to frame the book. These are: the desire for simple stories, our sense that we are right, our desire to get along with others in our group, our fixation with control, and our constant quest to protect and defend our egos. In addition to understanding why these natural impulses steer us wrong in a fast-moving world, leaders will get powerful questions and approaches that help them escape these patterns.

This book recounts the experiences of adults living successfully with attention deficit disorder. Acclaimed A.D.D. expert Dr. Lynn Weiss tells the stories of 15 individuals who have learned to incorporate A.D.D. attributes positively into their lives and triumph.

A Success Best Book of 2015 Business psychologist Tony Crabbe outlines a unique three-step approach to combating one of the modern life's great problems: being too busy. BUSY is divided into four digestible sections--Mastery, Differentiation, and Engagement--that will teach readers how to switch from managing time to managing attention, how to transition toward a career strategy that doesn't hinge on productivity, how to think differently about success by re-engaging with what matters, and how to create the impetus, energy, and clarity to put all these changes into effect. Crabbe draws on entertaining psychological studies to show why we're getting it wrong at the moment and to develop a fresh new approach to taking back one's life from chaotic outside forces. Rarely has a book been more timely in both its scope and in its immediate impact.

Whereas the current and common theory is that autism is an intractable deficit of the brain, Dr Martha Herbert offers a new and more hopeful explanation: autism is a disorder of the body that impacts the brain.
