Learn the math skills you need to process information, analyze data, and more with FINANCIAL MATH REVIEW, a 30-hour text-workbook. Through easy-to-understand directions and common vocabulary terms, you'll get the best instruction available on whole numbers, fractions, decimals, equations, percentages, and measurement. FINANCIAL MATH REVIEW also helps you get the most out of your calculator by giving you the quick tips you need. Plus, you'll learn how to use math to simplify your life and make better decisions.

Financial Algebra: Advanced Algebra with Financial Applications is a substantive modeling course for all students that teaches and uses advanced algebra in the content areas of discretionary spending, banking, credit, auto and home ownership, employment, taxes, investments, entrepreneurship, retirement, & budgeting. The program draws upon selected topics from Advanced Algebra, Geometry, Precalculus, Statistics and Probability. Students need only an Algebra 1 prerequisite. The newest edition includes the most recent IRS tax code updates and how they affect our daily lives. Over the decades, the program has proven to be a motivating, engaging, and rewarding experience for all students.

Mathematics research papers provide a forum for all mathematics enthusiasts to exercise their mathematical experience, expertise and excitement. The research paper process epitomizes the differentiation of instruction, as each student chooses their own topic and extends it as far as their desire takes them. The features and benefits of the research paper process offer a natural alignment with all eight Common Core State Standards for Mathematical Practice. Writing Math Research Papers serves both as a text for students and as a resource for instructors and administrators. This program received the 1997 Chevron Best Practices in Education Award as the premier high school mathematics course in the United States. This book is an excellent resource for students and teachers of the International Baccalaureate program.

This book comprises chapters featuring a state of the art of research on digital technology in mathematics education. The chapters are extended versions of a selection of papers from the Proceedings of the 13th International Conference on Technology in Mathematics Teaching (ICTMT-13), which was held in Lyon, France, from July 3rd to 6th. ICTMT-13 gathered together over one hundred participants from twenty countries sharing research and empirical results on the topical issues of technology and its potential to improve mathematics teaching and learning. The chapters are organised into 4 themed parts, namely assessment in mathematics education and technology, which was the main focus of the conference, innovative technology and approaches to mathematics education, teacher education and professional development toward the technology use, and mathematics teaching and learning experiences with technology. In 13 chapters contained in the book, prominent mathematics educators from all over the world present the most recent theoretical and practical advances on these themes. This book is of particular interest to researchers, teachers, teacher educators and other actors interested in digital technology in mathematics education.

This book reviews and refreshes skills that are need to take the math portion of the GRE.
