The book *Psychosocial Perspectives on Peacebuilding* offers a template for those dealing with the aftermath of armed conflict to look at peacebuilding through a psychosocial lens. This Volume, and the case studies that are in it, starts from the premise that armed conflict and the political violence that flows from it, are deeply contextual and that in dealing with the impact of armed conflict, context matters. The book argues for a conceptual shift, in which psychosocial practices are not merely about treating individuals and groups with context and culturally sensitive methods and approaches: the contributors argue that such interventions and practices should in themselves shape social change. This is of critical importance because the psychosocial method continually highlights how the social context is one of the primary causes of individual psychological distress. The chapters in this book describe experiences within very different contexts, including Guatemala, Jerusalem, Indian Kashmir, Mozambique, Northern Ireland, South Africa and Sri Lanka. The common thread between the case studies is that they each show how psychosocial interventions and practices can influence the peacebuilding environment and foster wider social change. *Psychosocial Perspectives on Peacebuilding* is essential reading for social and peace psychologists, as well as for students and researchers in the field of conflict and peace studies, and for psychosocial practitioners and those working in post-conflict areas for NGO ' s.

Tales of neoliberalism ' s death are serially overstated. Following the financial crisis of 2008, neoliberalism was proclaimed a “ zombie, ” a disgraced ideology that staggered on like an undead monster. After the political ruptures of 2016, commentators were quick to announce “ the end ” of neoliberalism yet again, pointing to both the global rise of far-right forces and the reinvigoration of democratic socialist politics. But do new political forces sound neoliberalism ' s death knell or will they instead catalyze new mutations in its dynamic development? *Mutant Neoliberalism* brings together leading scholars of neoliberalism—political theorists, historians, philosophers, anthropologists and sociologists—to rethink transformations in market rule and their relation to ongoing political ruptures. The chapters show how years of neoliberal governance, policy, and depoliticization created the conditions for thriving reactionary forces, while also reflecting on whether recent trends will challenge, reconfigure, or extend neoliberalism ' s reach. The contributors reconsider neoliberalism ' s relationship with its assumed adversaries and map mutations in financialized capitalism and governance across time and space—from Europe and the United States to China and India. Taken together, the volume recasts the stakes of contemporary debate and reorients critique and resistance within a rapidly changing landscape. Contributors: Étienne Balibar, Sören Brandes, Wendy Brown, Melinda Cooper, Julia Elyachar, Michel Feher, Megan Moodie, Christopher Newfield, Dieter Plehwe, Lisa Rofel, Leslie Salzinger, Quinn Slobodian

One of the most significant and important advancements in information and communication technology over the past 20 years is the introduction and expansion of the Internet. Now almost universally available, the Internet brings us email, global voice and video communications, research repositories, reference libraries, and almost unlimited opportunities for daily activities. Bridging geographical distances in unprecedented ways, the Internet has impacted all aspects of our daily

lives – from facilitating the running of businesses, the attainment of services and keeping in touch with friends and family. Accessible at any time and for many of us from our mobile phones, the Internet has opened up a world of knowledge and communication platforms that we cannot now imagine living without. This book explores the concept that the Internet has become a second action space for individuals. Coexisting with traditional and "obvious" real space, the Internet serves as a novel spatial platform and action space to its subscribers all over the world. Kellerman expertly discusses this notion and examines the practical integration of cyberspace with real space. Part I examines the Internet as a platform for action and presents its relations with physical space concerning a range of uses and applications which were traditionally performed in physical space only. It discusses the idea that the Internet has become a second space and explores theoretical perspectives surrounding this notion. The Internet has undeniably made humankind more efficient and connected. Part II explores the Internet as an action space for human life, considering basic human needs, curiosity, identity and social relations. It further considers instances whereby use and application of the Internet cannot be fully performed in real space, mainly regarding people's presentation of identity. Part III explores daily actions over the Internet, such as work, shopping, banking and social interactions. Kellerman also briefly touches on the darker aspects that the expansion of the Internet has made possible – including its role in fraud and other crimes. The concluding chapter discusses people living across the two spaces and identifies potential future developments. The Internet as Second Actions Space will appeal to students across the social sciences, in particular those studying Geography, Sociology, Media Studies, Internet Studies, Business and related disciplines.

Is naval conflict in the Asia-Pacific region becoming more likely? On the face of it, this seems likely; nearly all countries in the region are rapidly modernising their navies and expanding their maritime capabilities at a time of increasingly rancorous disputes over sovereignty. This is especially the case in the East and South China Seas, with their supply of fish and largely untapped resources in oil and gas. Across the region there is a growing recognition of the economic importance of the sea, both for its resources and for the crucial shipping it facilitates. But economic growth goes both ways, developing increasing interdependence between the countries of the region. Expanding trade is subject to serious threats from pirates, drug-smugglers and other forms of maritime crime, and navies and coastguards are coming together to combat them. Which will prevail, the tendency to compete, or the tendency to cooperate? In reviewing the maritime policies of the major countries of the region, this volume aims to answer this question.

Throughout the world, teaching is looked at as one of the most respected and noble profession a person could have. A great teacher not only shows the right path that a student should follow but also prepares the human resources for the further development of the nation. Among various exams CTET is the most popular teaching exam in the country. Central Teaching Eligibility Test (CTET) is a national level test conducted by CBSE twice a year to recruit the eligible candidates as teacher. The exam is conducted into 2 papers: Paper 1 for class 1-5 and Paper 2 for class 6-8. Any candidate who is interested to become a teacher for classes 6 to 8 then they have to appear for both the papers. The new the edition of Study Guide 'Success Master CTET Social Science/ Studies Paper – II' has been prepared completely on the latest exam pattern. The book has been divided into 5 key sections and further divided into chapters providing the focused study material. After covering theoretical part this book also concentrates on the practice part, it provides Previous Years' Solved Paper, 2 practice sets and more than 3000 MCQs for thorough practice. Ample numbers of questions have been given which are covered in a Chapterwise manner that allows candidates to understand the trend of the questions as well as the exam. This book will prove to be highly useful for the CTET Paper 2 exam as it will help in achieving the good rank in the exam. TABLE OF CONTENT Solved Paper 2019 (December), Solved Paper 2019 (July), Solved Paper 2018 (December), Solved Paper 2016 (September), Child Development and Pedagogy, English Language and Pedagogy, Hindi Bhasha evm Shiksha Shastra, Social Science/ Studies Pedagogy, Pedagogy, Practice Sets (1-2).

This book explores the idea, psychology and political geography of Northeast India as forged by two interrelated but autonomous meta-narratives. First, the politics of conflict inherent in, and therefore predetermined by physical geography, and second, the larger geopolitics that was unfolding during the colonial period. Unravelling the history behind the turmoil engulfing Northeast India, the study contends that certain geographies — most pertinently fertile river valleys and surrounding mountains which feed the rivers — are integral to nature and any effort to disrupt this cohesion will result in conflict. It comprehensively traces the geopolitics of the region since colonial era — in particular the Great Game; the politics that went into the making of the McMahon Line, the Radcliffe Line and the Pemberton Line; the region's relations with its international neighbours (China, Bhutan, Myanmar, Bangladesh and Nepal); as well as the issue of many formerly non-state-bearing populations awakening to the reality of the modern state. Lucid and analytical, this book will be of great interest to scholars and researchers of Northeast India, modern Indian history, international relations, defence and strategic studies, and political science.

Rooted in a long and diverse genealogy, biographical approaches have developed from a focus upon a single story, a 'life story' and personal documents (e.g. diaries), to encompass (more routinely) autobiographical secondary and archival research and analysis - as well as multi-media, arts based creative multi-sensory methods. Biographical Research and practices as part of human understanding helps people to make sense of what has been and what is happening in their lives, cultures, communities and societies. *Advances in Biographical Methods: Creative Applications* takes up these themes: theorising, doing and applying current advances in biographical methods. It demonstrates the momentum with which they areas are developing as a field of scholarship, especially in relation to creative innovations and applications, such as in new forms of interview and other practices, and debates on its interlinking with art, performance and digital methods.

An increase in the restrictions on the availability of funding for new and growing businesses in the aftermath of the global financial crisis has been accompanied by the emergence and growth of crowdfunding as an alternative method of raising capital. Crowdfunding contributes towards the disintermediation of the finance market as funders and promoters are brought together directly, democratising both fundraising by businesses and investment by individuals. This book extends entrepreneurial finance research to the study of crowdfunding. Contributions review the history, status and future of crowdfunding, analyse the patterns of fundraising, assess the potential of crowdfunding for the financing of social ventures in particular, and discuss the regulatory implications of recent developments. What is clear from this collection is that the crowdfunding space is still evolving, institutional forms are still developing as models are refined, new institutional collaborations (e.g. between equity platforms and business angel networks) are emerging, and new challenges, particularly regulatory challenges, are being encountered. While crowdfunding is not a universal solution for SME finance in a post-crisis financial landscape, it remains too early to determine whether crowdfunding represents a large-scale transformation of the early stage risk capital market or a minor addition to it. This book was originally published as a special issue of *Venture Capital*.

This enlightening book elucidates the leadership challenges of various cities in emerging transitions towards higher levels of sustainability. It examines elements of three socio-technical systems, energy, transport and healthcare, while addressing technology invention, commercialization, mass-production and adoption. The book breaks new ground in the analysis of topical issues such as local 'cradle' conditions, incentive schemes, niche-development, living labs, impact bonds, grass-roots intermediation and adaptive policy making. It offers a broad coverage of global systems of cities, with a particular focus on Scandinavia, Germany, the Netherlands, China, Korea, Japan, the US and Canada.

Why did the people of the Zambesi Delta affected by severe flooding return early to their homes or even choose to not evacuate? How is the forced resettlement of small-scale farmers living along the foothills of an active volcano on the Philippines impacting on their day-to-day livelihood routines? Making sense of such questions and observations is only possible by understanding how the decision-making of societies at risk is embedded in culture, and how intervention measures acknowledge, or neglect, cultural settings. The social construction of risk is being given increasing priority in understand how people experience and prioritize hazards in their own lives and how vulnerability can be reduced, and resilience increased, at a local level. Culture and Disasters adopts an interdisciplinary approach to explore this cultural dimension of disaster, with contributions from leading international experts within the field. Section I provides discussion of theoretical considerations and practical research to better understand the important of culture in hazards and disasters. Culture can be interpreted widely with many different perspectives; this enables us to critically consider the cultural boundedness of research itself, as well as the complexities of incorporating various interpretations into DRR. If culture is omitted, related issues of adaptation, coping, intervention, knowledge and power relations cannot be fully grasped. Section II explores what aspects of culture shape resilience? How have people operationalized culture in every day life to establish DRR practice? What constitutes a resilient culture and what role does culture play in a society ' s decision making? It is natural for people to seek refuge in tried and trust methods of disaster mitigation, however, culture and belief systems are constantly evolving. How these coping strategies can be introduced into DRR therefore poses a challenging question. Finally, Section III examines the effectiveness of key scientific frameworks for understanding the role of culture in disaster risk reduction and management. DRR includes a range of norms and breaking these through an understanding of cultural will challenge established theoretical and empirical frameworks.
