The new Penguin history of the world by Penguin Press/Allen Lane, 2012"--Title page verso.

Far more than a history of the Silk Roads, this book is truly a revelatory new history of the world, promising to destabilize notions of where we come from and where we are headed next. From the Middle East and its political instability to China and its economic rise, the vast region stretching eastward from the Balkans across the steppe and South Asia has been thrust into the global spotlight in recent years. Frankopan teaches us that to understand what is at stake for the cities and nations built on these intricate trade routes, we must first understand their astounding pasts. Frankopan realigns our understanding of the world, pointing us eastward. It was on

the Silk Roads that East and West first encountered each other through trade and conquest, leading to the spread of ideas, cultures and religions. From the rise and fall of empires to the spread of Buddhism and the advent of Christianity and Islam, right up to the great wars of the twentieth century—this book shows how the fate of the West has always been inextricably linked to the East. Also available: *The New Silk Roads*, a timely exploration of the dramatic and profound changes our world is undergoing right now—as seen from the perspective of the rising powers of the East.

"History of the World" within the grasp of every home, school, and library. Roberts brilliantly tells the story of the growing power of humans to remake the world and to control their destinies.

Eminent historian Paul Strathern opens the story of Empire with the Akkadian civilization, which ruled over a vast expanse of the region of ancient Mesopotamia, then turns to the immense Roman Empire, where we trace back our Western and Eastern roots. Next the narrative describes how a great deal of Western Classical culture was developed in the Abbasid and Umayyid Caliphates. Then, while Europe was beginning to emerge from a period of cultural stagnation, it almost fell to a whirlwind invasion from the East, at which

point we meet the Emperors of the Mongol Empire . . . Combining breathtaking scope with masterful narrative control, Paul Strathern traces these connections across four millennia and sheds new light on these major civilizations—from the Mongol Empire and the Yuan Dynasty to the Aztec and Ottoman, through to the most recent and biggest empires: the British, Russo-Soviet, and American. Charting five thousand years of global history in ten lucid chapters, *Empire* makes comprehensive and inspiring reading to anyone fascinated by the history of the world.

human societies to the Holy Roman Empire, from the Middle Ages to the Enlightenment, from the Industrial Revolution to the end of the twentieth century, Chris Harman provides a brilliant and comprehensive history of the human race. Eschewing the standard accounts of "Great Men," of dates and kings, Harman offers a groundbreaking counter-history, a breathtaking sweep across the centuries in the tradition of "history from below." In a fiery narrative, he shows how ordinary men and women were involved in creating and changing society and how conflict between classes was often at the core of these developments. While many scholars see the victory of capitalism as now safely secured, Harman explains the rise and fall of societies and civilizations throughout the ages and demonstrates that history moves

ever onward in every age. This magisterial study is essential reading for anyone interested in how society has changed and developed and the possibilities for further radical progress. I have had many people ask me if there is a book which does for world history what my book *A People's History of the United States* does for this country. I always responded that I know of only one book that accomplishes this extremely difficult task, and that is Chris Harman's *A People's History of the World*. —Howard Zinn

state, democracy, and inequality—and revealing new possibilities for human emancipation. For generations, our remote ancestors have been cast as primitive and childlike—either free and equal innocents, or thuggish and warlike. Civilization, we are told, could be achieved only by sacrificing those original freedoms or, alternatively, by taming our baser instincts. David Graeber and David Wengrow show how such theories first emerged in the eighteenth century as a conservative reaction to powerful critiques of European society posed by Indigenous observers and intellectuals. Revisiting this encounter has startling implications for how we make sense of human history today, including the origins of farming, property, cities, democracy, slavery, and civilization itself. Drawing on pathbreaking research in archaeology and

anthropology, the authors show how history becomes a far more interesting place once we learn to throw off our conceptual shackles and perceive what's really there. If humans did not spend 95 percent of their evolutionary past in tiny bands of hunter-gatherers, what were they doing all that time? If agriculture, and cities, did not mean a plunge into hierarchy and domination, then what kinds of social and economic organization did they lead to? The answers are often unexpected, and suggest that the course of human history may be less set in stone, and more full of playful, hopeful possibilities, than we tend to assume. The Dawn of Everything fundamentally transforms our understanding of the human past and offers a path toward imagining new forms of freedom, new ways of organizing society. This is a
