Over the past three decades or so, the nonprofit, voluntary, or third sector has undergone a major transformation from a small cottage industry to a major economic force in virtually every part of the developed world as well as elsewhere around the globe. Nonprofit organizations are now major providers of public services working in close cooperation with governments at all levels and increasingly find themselves in competition with commercial firms across various social marketplaces. This transformation has come with ever-increasing demands for enhancing the organizational capacities and professionalizing the management of nonprofit institutions. The Routledge Companion to Nonprofit Management is the first internationally focused effort to capture the full breadth of current nonprofit management research and knowledge that has arisen in response to these developments. With newly commissioned contributions from an international set of scholars at the forefront of nonprofit management research, this volume provides a thorough overview of the most current management thinking in this field. It contextualizes nonprofit management globally, provides an extensive introduction to key management functions, core revenue sources and the emerging social enterprise space, and raises a number of emerging topics and issues that will shape nonprofit management in future decades. As graduate programs continue to evolve to serve the training needs in the field, The Routledge Companion to Nonprofit Management is an essential reference and resource for graduate students, researchers, and practitioners interested in a deeper understanding of the operation of the nonprofit sector.

Social participation is an important means for governments to develop responsive health policies and programmes, which are more likely to be implemented by a broad stakeholder group. It is at the heart of the inclusive governance needed for countries to stake their individual paths towards Universal Health Coverage while ensuring that no one is left behind. As simple as it may seem in theory, it is a complex undertaking in practice, one which policy-makers struggle with. The Handbook on Social Participation for UHC is thus designed to provide practical guidance, anchored in conceptual clarifications, on strengthening meaningful government engagement with the population, communities, and civil society for national health policy-making. It draws on best practices and lessons learned to support government institutions in setting up, fine-tuning, improving, and institutionalizing new or existing participatory health governance mechanisms. The handbook follows through the different tasks which policy-makers must reflect on and undertake when bringing in people's voice into health policy-making. Examples include creating an enabling environment for participation, ensuring good representation, strengthening capacities, increasing policy-uptake of participatory process results, and sustaining participatory engagement over time. A fundamental premise of the handbook rests on the idea that policy-makers can leverage format and design elements of a participatory process to address power dynamics amongst participants, thereby fostering more meaningful contributions to the process.
