This getting started guide will answer your most common questions, reveal the secrets to success and get you diving into building your first app.

Learn iOS programming with this free lesson plan

Learning iOS programming is no different. The best way to start is to open up Xcode and try to build a Hello World demo. For non-programmers, this is simply an app that outputs 'Hello World' on the screen when you run it. From there, learn how to layout some UI Elements on the screen and how to respond to user interactions and gestures.

Learning iOS Programming

To develop iOS apps using the latest technologies described in these lessons, you need a Mac computer (macOS 10.11.5 or later) running the latest version of Xcode. Xcode includes all the features you need to design, develop, and debug an app. Xcode also contains the iOS SDK, which extends Xcode to include the tools, compilers, and frameworks you need specifically for iOS development.
