Between Integration and Secession asks whether Muslim minorities can co-exist with the majority and other cultures within non-Muslim states. Moshe Yegar's excellent new work examines the radicalization of Muslim communities during the nationalist fervor that swept southeast Asia in the aftermath of World War II. The book's grand historical scope traces the theological and political impact of the postwar Islamic renaissance on the creation of Muslim separatist tendencies and heightened religious consciousness. Drawing on a wealth of archival and secondary sources, Yegar examines three cases of rebellion in Muslim minorities: in the Philippines, in Thailand, and in Burma/Myanmar. He studies the communities' struggle to define their aims--be it for communal separation, autonomy, or independence--and the means each has at their disposal to achieve them.

Provides an up-to-date guide to over 300 developed or emerging national groups worldwide, some of whom are poised to shape the world of tomorrow.

This study of minorities involves the difficult issues of rights, justice, equality, dignity, identity, autonomy, political liberties, and cultural freedoms. The A-Z Encyclopedia presents the facts, arguments, and areas of contention in over 560 entries in a clear, objective manner. For a full list of entries, contributors, and more, visit the Encyclopedia of the World's Minorities website.

This is the first full-length book on British military airfield buildings and complements the titles in PSL's best-selling Action Stations series. Covering the period from the pioneering airship days, prior to the First World War, through to the immediate post Second World War jet age, it is profusely illustrated with photographs and line drawings. Information has been obtained both from official and manufacturers' records and on-site surveys of surviving structures. Details of construction methods and materials are included for all the main types of building that have featured on Britain's military airfields. These include aircraft hangars, control towers, armouries, guardhouses, parachute stores, training establishments and domestic buildings such as barracks and messes. The locations of many surviving examples of building types are given, including those that have been listed for their historic and/or architectural importance. The birth of military air traffic control is also described as this had a significant influence on the design of certain types of building. The rapid development, progress and growth of British aviation, from its inception through to the introduction of jet aircraft, can be seen clearly in this detailed study of its infrastructure. This book will therefore be an invaluable source of reference for all who are interested in military aviation and the history of the Royal Air Force in particular.

This book explores issues of nationalism and intra-state conflicts in postcolonial nations. Drawing from international law, social anthropology, political science and strategic studies, peace and conflict studies, and memory studies, each chapter adopts a unique conceptual lens and discourse to understand the nationalism debate and its conflicts.

The tourism industry of India is economically important and growing rapidly. The World Travel & Tourism Council calculated that tourism generated ? 6.4 trillion or 6.6% of the nation's GDP in 2012. It supported 39.5 million jobs, 7.7% of its total employment. The sector is predicted to grow at an average annual rate of 7.9% from 2013 to 2023. This gives India the third rank among countries with the fastest growing tourism industries over the next decade. India has a large medical tourism sector which is expected to grow at an estimated rate of 30% annually to reach about ? 95 billion by 2015. According to provisional statistics 6.29 million foreign tourists arrived in India in 2011, an

increase of 8.9% from 5.78 million in 2010. This ranks India as the 38th country in the world in terms of foreign tourist arrivals. Domestic tourist visits to all states and Union Territories numbered 1,036.35 million in 2012, an increase of 16.5% from 2011. The most represented countries are the United States (16%) and the United Kingdom (12.6%). In 2011 Maharashtra, Tamil Nadu and Delhi were the most popular states for foreign tourists. Domestic tourists visited the states Uttar Pradesh, Andhra Pradesh and Tamil Nadu most frequently. Chennai, Delhi, Mumbai and Agra have been the four most visited cities of India by foreign tourists during the year 2011. Worldwide, Chennai ranked 41 by the number of foreign tourists, while Delhi is ranked at 50, Mumbai at 57 and Agra at 65 and Kolkata at 99. The Travel & Tourism Competitiveness Report 2013 ranks India 65th out of 144 countries overall. The report ranks the price competitiveness of India's tourism sector 20th out of 144 countries. It mentions that India has quite good air transport (ranked 39th), particularly given the country's stage of development, and reasonable ground transport infrastructure (ranked 42nd). Some other aspects of its tourism infrastructure remain somewhat underdeveloped however. The nation has very few hotel rooms per capita by international comparison and low ATM penetration. As per the UNWTO World Tourism Barometer, December 2013, India's rank in the World Tourism Receipts during 2012 was 16th and rank in international tourist arrivals was 41. The rank of India was 7th among Asia and the Pacific Region in terms of tourism receipts during 2012. The Ministry of Tourism designs national policies for the development and promotion of tourism. In the process, the Ministry consults and collaborates with other stakeholders in the sector including various Central Ministries/ agencies, State Governments, Union Territories and the representatives of the private sector. Concerted efforts are being made to promote new forms of tourism such as rural, cruise, medical and eco-tourism. The Ministry also maintains the Incredible India campaign. India's rich history and its cultural and geographical diversity make its international tourism appeal large and diverse. It presents heritage and cultural tourism along with medical, business, educational and sports tourism. Therefore the practitioners, academicians and researchers need to meticulously review these aspects and acquaint them with knowledge to sustain in such scenarios. Thus, these evident scenarios emphasize the need of a broad-based research in the field of Tourism in India. This book is an attempt in that direction. I sincerely hope that this book will provide insights into the subject to faculty members, researchers and students from the Tourism institutes, consultants, practicing managers from industry and government officers.
