Every society has its cultures: the patterns of how people live and express themselves and how they value objects and thoughts. What constitutes Indian heritage and cultures has been much discussed. Romila Thapar begins by explaining how the definitions of the concept of culture have changed since the last three centuries and hence require added attention. Cultures when defined by drawing on selected items and thoughts from the past, remain relatively unknown, except to a few. Yet each has a context and meaning relating them to the past and to their significance as a contemporary presence. Contexts, often regarded as unconnected to culture, can to the contrary, be quite illuminating. Thapar touches on a few of these, ranging from objects that identify cultures, to ideas that shape cultures, such as social discrimination, the role of women and attitudes to science and knowledge. Thought-provoking books such as this spark debate and the debate may lay to rest some current shibboleths about India ' s culture. --

Three Men in a Boat published in 1889, is a humorous account by English writer Jerome K. Jerome of a two-week boating holiday on the Thames from Kingston upon Thames to Oxford and back to Kingston. The book was initially intended to be a serious travel guide, with accounts of local history along the route, but the humorous elements took over to the point where the serious and somewhat sentimental passages seem a distraction to the comic novel. One of the most praised things about Three Men in a Boat is how undated it appears to modern readers - the jokes have been praised as fresh and witty

Many of the earliest books, particularly those dating back to the 1900s and before, are now extremely scarce and increasingly expensive. We are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork.

Hiroshima is the story of six people--a clerk, a widowed seamstress, a physician, a Methodist minister, a young surgeon, and a German Catholic priest--who lived through the greatest single manmade disaster in history. In vivid and indelible prose, Pulitzer Prize-winner John Hersey traces the stories of these half-dozen individuals from 8:15 a.m. on August 6, 1945, when Hiroshima was destroyed by the first atomic bomb ever dropped on a city, through the hours and days that followed. Almost four decades after the original publication of this celebrated book, Hersey went back to Hiroshima in search of the people whose stories he had told, and his account of what he discovered is now the eloquent and moving final chapter of Hiroshima.
