The Indian state of West Bengal is home to one of the world's most vibrant traditions of goddess worship. The year's biggest holidays are devoted to the goddesses Durga and Kali, with lavish rituals, decorated statues, fireworks, and parades. In Offering Flowers, Feeding Skulls, June McDaniel provides a broad, accessibly written overview of Bengali goddess worship. McDaniel identifies three major forms of goddess worship, and examines each through its myths, folklore, songs, rituals, sacred texts, and practitioners. In the folk/tribal strand, which is found in rural areas, local tribal goddesses are worshipped alongside Hindu goddesses, with an emphasis on possession, healing, and animism. The tantric/yogic strand focuses on ritual, meditation, and visualization as ways of experiencing the power of the goddess directly. The devotional or bhakti strand, which is the most popular form, involves the intense love and worship of a particular form of the goddess. McDaniel traces these strands through Bengali culture and explores how they are interwoven with each other as well as with other forms of Hinduism. She also discusses how these practices have been reinterpreted in the West, where goddess worship has gained the values of sexual freedom and psychological healing, but lost its emphases on devotion and asceticism. Offering Flowers, Feeding Skulls takes the reader inside the lives of practicing Shaktas, including holy women, hymn singers, philosophers, visionaries, gurus, ascetics, healers, musicians, and businessmen, and offers vivid descriptions of their rituals, practices, and daily lives. Drawing on years of fieldwork and extensive research, McDaniel paints a rich, expansive portrait of this fascinating religious tradition.

Intelligence quotient, as a useful means of measuring brain capacity, has come increasingly into the public eye in recent years. This famous book (and its sequel Check Your Own IQ) enables the reader to estimate and confirm his/her own IQ rating.

A dynamic and hip collective biography that presents forty-four of America's greatest movers and shakers, from Frederick Douglass to Aretha Franklin to Barack Obama, written by ESPN's TheUndefeated.com and illustrated with dazzling portraits by Rob Ball. Meet forty-four of America's most impressive heroes in this collective biography of African American figures authored by the team at ESPN's TheUndefeated.com. From visionaries to entrepreneurs, athletes to activists, the Fierce 44 are beacons of brilliance, perseverance, and excellence. Each short biography is accompanied by a compelling portrait by Robert Ball, whose bright, graphic art pops off the page. Bringing household names like Serena Williams and Harriet Tubman together with lesser-known but highly deserving figures such as Robert Abbott and Dr. Charles Drew, this collection is a celebration of all that African Americans have achieved, despite everything they have had to overcome.

Appropriate for one-semester art history surveys or historically-focused art appreciation classes, A History of Western Art, Fourth Edition, offers an exciting new CD-ROM, additional color plates, and a number of new features. Focusing on the Western canon of art history, the text presents a compelling chronological narrative from prehistory to the present. A new non-Western supplement, World Views: Topics in Non-Western Art, addresses specific areas of non-Western art and augments the Western chronology by illustrating moments of thematic relationships and cross-cultural contact. World Views is available at a discount when packaged with History of Western Art.

"When I listen to the evening news or read the morning paper these days my reaction is always the same: what's wrong in our world will not be set right until people who love God and who refuse to cave to these overwhelming challenges put the things they believe into action, things like courage and discipline and love." Bill Hybels Who You Are When No One's Looking has pointed the way to godly character for more than twenty years. Now Bill Hybels's essential book is completely revised and updated, featuring a new introduction, a new concluding chapter ("World-Change: When Character Counts Most") and a discussion guide for groups. Read this book to discover who God is calling you to be in the world around you.

A non-threatening, female-friendly introduction to the topic of male chastity, ideal for nervous keyholders or as a love-offering from a would-be-chastened male.

This overview of some of the main results and recent developments in nonlinear water waves presents fundamental aspects of the field and discusses several important topics of current research interest. It contains selected information about water-wave motion for which advanced mathematical study can be pursued, enabling readers to derive conclusions that explain observed phenomena to the greatest extent possible. The author discusses the underlying physical factors of such waves and explores the physical relevance of the mathematical results that are presented. The book is intended for mathematicians, physicists and engineers interested in the interplay between physical concepts and insights and the mathematical ideas and methods that are relevant to specific water-wave phenomena. The material is an expanded version of the author's lectures delivered at the NSF-CBMS Regional Research Conference in the Mathematical Sciences organized by the Mathematics Department of the University of Texas-Pan American in 2010.
