Oracle Application Framework  
Personalization Guide  
OA Personalization Framework  
supports end-users as well as  
localization and customization teams  
in their efforts to tailor OA Framework-  
based applications to different users.  
OA Personalization Framework  
accomplishes this by allowing you to  
make personalizations at distinct  
levels so that you may target those  
personalizations to specific audiences.

As an Oracle E-Business Suite Administrator, you can use OA Personalization Framework to personalize the pages of OA Framework-based applications at various personalization levels without modifying any code.

## Oracle Application Framework Personalization Guide

Welcome to Release 12.2 of the Oracle Application Framework Personalization Guide. This guide assumes you have a working knowledge of the following: The principles and customary practices of your business area. Computer desktop application usage and terminology. This documentation assumes familiarity with the Oracle E-Business Suite.

# File Type PDF Oracle Framework Personalization

## Oracle Application Framework Personalization Guide

OA Personalization Framework uses custom style sheets (.xss files) to specify and manage the visual styles of the Look-and-Feel of applications built with OA Framework. One of the goals of custom style sheets is to allow presentation styles, such as fonts and colors, to be separated from the HTML content to which the styles are applied.

## Oracle Application Framework Personalization Guide

Navigate back to the configurable page and launch OA Personalization Framework. Set the personalization level to the level specified in step 3. In the Content mode of the Page Layout Personalization page, use the Add Content page and Create Content

# File Type PDF Oracle Framework Personalization

button to add the region personalized in the previous step to a desired flexibleContent region.

Oracle Application Framework  
Personalization Guide

Set profile option "FND:  
Personalization Document Root Path"  
appropriately before exporting  
personalization. Go to Functional  
Administrator. Click on Personalization  
tab. Under Import/Export click on  
Personalization Repository. Give  
Document Root Path as  
"/oracle/apps/pos/supplier/webui"  
and press Go. Page will display all the  
Personalizations.

R12.x Extend Oracle Applications: OA Framework Personalizations, This course will be applicable for customers who have implemented Oracle E-Business Suite Release 12 or Oracle E-Business Suite 12.1. This course teaches you how to change the look and behavior of an Oracle E-Business Suite instance without programming, and without worrying about losing those personalizations during patching and upgrades.

If you've been thinking about installing or upgrading to Release 12 but need to understand more about why you should do so, this is the book for you. For functional users, The

# File Type PDF Oracle Framework Personalization

Release 12 Primer highlights the modules that have changed the most. Read about Oracle's Global Business Release, Master Data Management, MOAC and the Swan Interface. Then see how it all comes together for the Financials and Procurement product families, Supply Chain Management, CRM, and Projects. And if you've always wanted to understand more about the underlying technology, but found all the terminology too complex to sort through, this book covers the technical architecture, security issues, and even Fusion, targeting both functional and technical readers. "The Release 12 Primer provides the real story on the latest version of the Oracle E-Business Suite and its technical underpinnings. If you only buy one book on Oracle E-Business Release 12, buy this one." - Floyd M.
