Patient H.M.: A Story of Memory, Madness, and Family ...

Henry Gustav Molaison, known widely as H.M., was an American man who had a bilateral medial temporal lobectomy to surgically resect the anterior two thirds of his hippocampi, parahippocampal cortices, entorhinal cortices, piriform cortices, and amygdalae in an attempt to cure his epilepsy. Although the surgery was partially successful in controlling his epilepsy, a severe side effect was that he became unable to form new memories. The surgery took place in 1953 and H.M. was widely studied from l

Patient H.M., the overstuffed result of Dittrich’s six years of reporting, tries to be many things at once: a lyrical meditation on the nature of memory, an excavation of a disturbing and dark family history, and a damning illustration of the consequences of sacrificing ethics in the name of scientific inquiry.

Patient H.M.: A Story of Memory, Madness, and Family ...

Patient H.M. is a fascinating, powerful investigation, a matryoshka doll of nested stories about the past and present, remembering and forgetting. Luke Dittrich’s quest to understand the amnesiac patient who taught the world so much about memory – and ourselves – leads him to the shoals of his own family tragedy, and an ending that will break your heart.
