If this extension or module is not installed, you will get the error like = "Fatal error: Call to undefined function simplexml_load_string() in /var/www/html/soap.php on line 20". To install this extension in linux Centos use command = yum install php-xml. Don't forget to restart the Apache server after installing this module.

Call Soap Api with PHP SoapClient and Curl - Parse XML
) Parse error: syntax error, unexpected end of file in C:\wamp64\www\simulare_aeroport\PHP\adg.php on line 59 Parse error: syntax error, unexpected end of file in C:\xampp\htdocs\calendar\book.php on line 130

error in msg parsing:XML error parsing SOAP payload on ...
Simply calling $xml->SOAP-ENV:Envelope will result in an error due to the fact that hyphens and colons are not valid characters for object variables or methods. Whenever you are entering a new namespace, you can use SimpleXMLElement::children() to define the name space.

Parsing SOAP responses with PHP's SimpleXML by Josh Sherman
This error occurs because some versions of PHP SOAP client do not send the user name and password that you pass as the options input parameter of the SoapClient constructor . Yu need to pass the credentials in the web service URL like this:

PHP: SOAP - Manual
It was trying to parse the entire stream all at once and was running out of memory. However, if you break the parsing into chunks, it will not run out of memory. The text of the actual error: "XML error parsing SOAP payload on line 1: Out of Memory" Changes below were made in nusoap.php:-Starts after the line "xml_set_character_data_handler($this->parser,'character_data')".-Replaces the first part of the "if" clause.

NuSOAP - SOAP Toolkit for PHP / Discussion / Open ...
Returns a string with a textual description of the error error_code, or false if no description was found ...

PHP: xml_error_string - Manual
"SOAP-ERROR: Parsing WSDL: Couldn't find in 'PATH/TO/YOUR/WSDL'" This error occurs because some versions of PHP SOAP client do not send the user name and password that you pass as the options input parameter of the SoapClient constructor . Yu need to pass the credentials in the web service URL like this:

PHP: SOAP - Manual
my PHP setup: Downloaded php-5.3.3-nts-Win32-VC9-x86.zip today to my Windows 7 64-bit PC, renamed php.ini-development to php.ini, uncommented extension_dir, extension=php_soap.dll, and soap.wsdl_cache_dir. Ran php from the command line using a php file containing the script with the SoapClient.

Still getting SOAP-ERROR: Parsing Schema: unresolved element 'ref' attribute whith PHP 5.3.14 (cli) (built: Jun 19 2012 03:47:42) on CENTOS while parsing a WSDL containing <xs:attributeGroup ref="TelephoneInfoGroup"> <xs:annotation> <xs:documentation source="Description" xml:lang="en"> Information about a telephone number, including the actual number and its usage.

PHP :: Bug #44686 :: SOAP-ERROR: Parsing WSDL
Sharing my experience cuz i believe it is most important for you if you decide to use this Soap Client implementation. At

php 7.0.8 the stdClass generated by SoapClient from the response does not use "minOccurs" and "maxOccurs" WSDL modifiers to distinct properties in stdClass-es (aka keys in "associative arrays") and elements in arrays ("aka indexed arrays").

PHP: SoapClient::__soapCall - Manual
Usually, the response is parsed as "text/xml".If the responseType is set to "document" and the request was made asynchronously, instead the response is parsed as "text/html". responseXML is null for any other types of data, as well as for data: URLs.. If the server doesn't specify the Content-Type as "text/xml" or "application/xml", you can use XMLHttpRequest.overrideMimeType() to parse it as ...

XMLHttpRequest.responseXML - Web APIs | MDN
The actor Attribute. A SOAP message may travel from a sender to a receiver by passing different endpoints along the message path. However, not all parts of a SOAP message may be intended for the ultimate endpoint, instead, it may be intended for one or more of the endpoints on the message path.

Confirm ! PHP Version 5.2.10-2ubuntu6.4 Fatal error: Uncaught SoapFault exception: [WSDL] SOAP-ERROR: Parsing Schema: unresolved element 'ref' attribute in ... when parsing file with <xs:attributeGroup ref="OTA_PayloadStdAttributes"/> attribute.

PHP :: Bug #47119 :: SOAP-ERROR: Parsing WSDL
Since version 1.2.0 there's a new XML_Parser_Simple class that makes parsing of most XML documents easier, by automatically providing a stack for the elements. Furthermore its now possible to split the parser from the handler object, so you do not have to extend XML_Parser anymore in order to parse a document with it. » Maintainers

XML_Parser - PHP Extension and Application Repository
5.5 The SOAP Parsing Example. The parsing example, soap_main.cpp, demonstrates the use of rwsf::XmlReader to process content from an any element. To use this type of processing, you need to know the exact format of the XML data within the any element so you can know exactly the calls to make on the rwsf::XmlReader object.. This section describes the code in the provided example soap_main.cpp.
