Ron Hubbard, extending his earlier writings on Dianetics. Its original subtitle was "simplified, faster dianetic techniques", although more recent editions have the subtitle "Prediction of human behavior". It is one of the canonical texts of Scientology. The title of Science of Survival alludes to Science and Sanity, a highly popular work by Alfred Korzybski, the founder of general semantics. Hubbard acknowledged Korzybski's contributions in the book. It

Science and survival on Continent 7: Antarctica. At -100 degrees F, you'll survive for less than 3 minutes and burn 5,000 calories a day, and boiling water can turn to snow instantly. And, at less than 1% humidity, your body will lose water just breathing. This is Station Zero: Antarctica, where close-knit communities of scientists, engineers, and hardened field vets have forged an existence unlike anything on our planet.
