How to Match Subwoofers and Amplifiers - Crutchfield

HOW TO PICK A SUBWOOFER. Determine your budget - I usually say hold off on the sub for last. Get your speakers and amplifier settled and then figure out what you have to spend. If your budget for a surround sound is \$1000.. Spend \$600-800 on the other things. They make more of a difference usually.

---

[>GUIDE<] - Subwoofers : Zeos - reddit

The subwoofer's job is to produce the very low tones of your audio system's dynamic range. A true subwoofer will be able to reproduce a 20 Hz test tone, which will be felt more than it will be heard (making it great for home-theater applications), but 30 Hz will do very well in most listening environments and for most music.

Look at the back of your subwoofer, then set the low-pass crossover at least 10Hz higher than your main speakers' range. This range is the starting point when configuring your crossover. If your center speaker can produce 80Hz to 120Hz, then you want your low-pass crossover to be anywhere close to 90Hz.
