orienting building with solar criteria for 10% energy savings from cooling and heating. Integrate overhangs on southern side of building if possible for 1-5% cooling savings Integrate vertical Shading into building on E and W facades. Ideal orientation achieves a balance. Plan shift approach ensures good thermal exposures with day lighting.

BUILDING SYSTEMS - MIT

DESCRIPTION. ARCH 4425 Building Systems Integration (BSI) 2016 17 Term I. Instructor: Wilson Yik (wyyik@yahoo.com) Student Assistant: TBC. DESCRIPTION. This course combines fundamental topics covered in the building technology sequence of materials and construction, building structures, and environmental technology with the objective to provide a holistic overview of the design and integration of these systems in building design and construction.

DESCRIPTION

systems are physically connected, either directly to each other, or through an intermediary element. Meshed. systems interpenetrate and occupy the same space. Unified. more than one system is unified in the same element or material. Adapted from Rush, Richard D, AIA, Editor. The Building Systems Integration Handbook.
