Learn new words and learn to read with this narrated ebook! Ed the Dinosaur wakes up and gets his socks on, eats some rocks, and puts on his green shorts. He would like to ride his red sled, but there is no snow. Ed adds wheels to his sled, and now he can ride it when it's hot or cold! Promotes self-sufficiency and creative thinking. Includes a note to parents with tips on how to encourage reading and on how to help your child learn to read. Also included is a list of words to "point and read" to help young readers learn new words. As each word is read by a narrator, words are highlighted on the screen. Sounds effects are also included.

Edward gets more and more nervous as his older brother tries to convince him that a dinosaur egg is about to hatch under his bed.

Book Features: • 24 pages, 8 inches x 8 inches • Ages 5-7, Grades K-1 leveled readers • Simple, easy-to-read pages with vibrant illustrations • Features before and after reading vocabulary • Includes reading tips and comprehension and extension activities The Magic Of Reading: Introduce young learners to the magic of reading with We're Going on a Dinosaur Dig. This 24-page fictional adventure book features vibrant illustrations and simple language to practice early reading comprehension skills. Hands-On Reading Adventure: A group of friends go on an adventure to dig for dinosaur bones but find something much greater! Follow along as three best friends hike through grass, explore a jungle, and sludge through mud only to find an unexpected surprise. Features: More than just a fun story, this kids book also includes pre- and post-reading vocabulary lists, as well as reading tips for mid-story interaction and engagement. The book also includes end-of-book comprehension and extension activities. Leveled Books: Vibrant illustrations and leveled text work together to tell a fun story and promote reading comprehension skills. The book engages kindergarteners and first graders with short, simple language and high-interest topics like dinosaurs. Why Rourke Educational Media: Since 1980, Rourke Publishing Company has specialized in publishing engaging and diverse non-fiction and fiction books for children in a wide range of subjects that support reading success on a level that has no limits.

A colorful collection of dinosaurs heads off for a "stomp in the swamp."

Tells the story of two nineteenth-century paleontologists who used questionable tactics as they tried to outdo each other in collecting dinosaur bones.

This new book, greatly expanded from the 1995 first edition, describes detailed, step-by-step procedures for sculpting, molding and painting original prehistoric animals. It emphasizes the use of relatively inexpensive materials including oven-hardening polymer clay and wire. Additional tips are offered on how to build distinctive dino-dioramas and scenes involving one's own original sculptures that you will learn how to conceive and build. This book will appeal to a new generation who would like to break into the industry of paleosculpture. Techniques range from "basic" to "advanced." The authors also discuss what it means to be a "paleoartist."

The perfect way to introduce children to the fascinating world of dinosaurs. Full of interesting facts--did you know some dinosaurs had sharp front teeth while others had no front teeth at all? This alphabet book explores both the known and the not-so-well known dinosaurs. Meet the heterodontosaurus (one of the smallest known to exist), the megalosaurus (the first dinosaur ever discovered), the iguanodon, the ultrasaurus, and more! Once again, Jerry Pallotta and Ralph Masiello have combined their talents to create a unique children's book that will inform and entertain young readers.

There's a doorway on Mars that has mankind's greatest minds perplexed.Deep beneath Aeolis Mons an ancient secret is revealed, and a team of explorers led by Forest Judge, Deputy Commander of Gale Base Alpha, are dispatched to investigate. The prehistoric gateway reveals a biosphere preserving Earth's distant past, and as Judge and crew stand on the threshold of mankind's greatest discovery the Martian ground trembles.A roar thunders from within, the doorway closes, and the team is trapped.Six mission specialists, each with unique skills, each with different reasons for wanting to break free of the primordial trap. To get home Judge is forced to choose between escape and changing the course of humanity.What will he do?

The ideal textbook for non-science majors, this lively and engaging introduction encourages students to ask questions, assess data critically and think like a scientist. Building on the success of previous editions, Dinosaurs has been thoroughly updated to include new discoveries in the field, such as the toothed bird specimens found in China and recent discoveries of dinosaur soft anatomy. Illustrations by leading paleontological illustrator John Sibbick and new, carefully-chosen photographs, clearly show how dinosaurs looked, lived and their role in Earth history. Making science accessible and relevant through clear explanations and extensive illustrations, the text guides students through the dinosaur groups, emphasizing scientific concepts rather than presenting endless facts. Grounded in the common language of modern evolutionary biology – phylogenetic systematics – students learn to think about dinosaurs the way that professional paleontologists do.
