"I asked the sailor what an Elephant looked like; he replied that it was like nothing on earth." England, 1766: After a long voyage from the East Indies, a ship docks in Bristol, England, and rumor quickly spreads about its unusual cargo—some say a mermaid is on board. A crowd forms, hoping to catch a glimpse of the magical creature. One crate after another is unpacked: a zebra, a leopard, and a baboon. There's no mermaid, but in the final two crates is something almost as magical—a pair of young elephants, in poor health but alive. Seeing a unique opportunity, a wealthy sugar merchant purchases the elephants for his country estate and turns their care over to a young stable boy, Tom Page. Tom's family has long cared for horses, but an elephant is something different altogether. It takes time for Tom and the elephants to understand one another, but to the surprise of everyone on the estate, a remarkable bond is formed. *The Elephant Keeper*, the story of Tom and the elephants, in Tom's own words, moves from the green fields and woods of the English countryside to the dark streets and alleys of late-eighteenth-century London, reflecting both the beauty and the violence of the age. Nicholson's lush writing and deft storytelling complement a captivating tale of love and loyalty between one man and the two elephants that change the lives of all who meet them.

I asked the sailor what an Elephant looked like; he replied that it was like nothing on earth.

'A beautiful book about love and loss, fragility and chance, the wide world and the near world . . . full of intense light and colour, extraordinary glimpses, moving insights and subtle humour.' Richard Kerridge, author of *Cold Blood* As the summer draws to a close, a few snowbeds - some as big as icebergs - survive in the Scottish Highlands. Christopher Nicholson's *Among the Summer Snows* is both a celebration of these great, icy relics and an intensely personal meditation on their significance. A book to delight all those interested in mountains and snow, full of vivid description and anecdote, it explores the meanings of nature, beauty and mortality in the twenty-first century. 'This ravishingly lovely book is about thought-snow, summer snow, flight, falling, stillness, memory, loss, mountains, Time, death, survival and everything in between. It is an intense scrutiny of minute worlds, a roaming gaze into the vastness of space, intimate, introspective and questioning.' Keggie Carew, author of *Dadland*

A fictionalized account of the final years of Thomas Hardy's life sees the premiere of the London theatre production of his acclaimed "Tess of the D'Urbervilles" and his obsessive infatuation with the show's star revealed to his reclusive wife.

Elephants have fascinated humans for millennia. Aristotle wrote of them with awe; Hannibal used them in warfare; and John Donne called the elephant "Nature's greatest masterpiece. . . . The only harmless great thing." Their ivory has been sought after and treasured in most cultures, and they have delighted zoo and circus audiences worldwide for centuries. But it wasn't until the second half of the twentieth century that people started to take an interest in elephants in the wild, and some of the most important studies of these intelligent giants have been conducted at Amboseli National Park in Kenya. The Amboseli Elephants is the long-awaited summation of what's been learned from the Amboseli Elephant Research Project (AERP)—the longest continuously running elephant research project in the world. Cynthia J. Moss and Harvey Croze, the founders of the AERP, and Phyllis C. Lee, who has been closely involved with the project since 1982, compile more than three decades of uninterrupted study of over 2,500 individual elephants, from newborn calves to adult bulls to old matriarchs in their 60s. Chapters explore such topics as elephant ecosystems, genetics, communication, social behavior, and reproduction, as well as exciting new developments from the study of elephant minds and cognition. The book closes with a view to the future, making important arguments for the ethical treatment of elephants and suggestions to aid in their conservation. The most comprehensive account of elephants in their natural environment to date, The Amboseli Elephants will be an invaluable resource for scientists, conservationists, and anyone interested in the lives and loves of these extraordinary creatures.

'I recommend Heather's book to everyone. It's brilliant!' Dara McAnulty, author of *Diary of a Young Naturalist* An entrancing book of exploration, marine life and natural wonders. 'Wherever I go, I seek out beaches. They are woven through my life; a changing constant in a constantly changing world. Every walk through the rock pools, from the tideline to the low water mark, takes me on a journey into the sea and challenges my understanding of my world and of myself.' The British beach is full of creatures that we think we know - from crabs to clams, starfish to anemones. But, in fact, we barely understand how many survive or thrive. In *Rock Pool* the delights of childhood paddling are elevated to oceanic discoveries, as the fragile beauty and drama of intertidal existence is illustrated through the incredible lives of twenty-four individual creatures. The eye-opening account of a life-long passion by a talented writer and naturalist. 'Here are three simple steps to help you feel better about the world: read Heather Buttivant's marvellous book, grab a pair of wellies and get yourself to a rocky shore ... [a] thoughtful, enlightening and entertaining read.' BBC Wildlife Magazine

Discover the secret missions behind America's greatest conflicts. Danny Manion has been fighting his entire life. Sometimes with his fists. Sometimes with his words.
