The Civil War and Reconstruction - 1865-1890: The Unfinished Revolution, examines the pivotal but misunderstood era of Reconstruction that followed the Civil War, the first effort in American history to construct an interracial democracy. Beginning with a discussion of the dramatic change in historians' interpretations of the period in the last two generations, the course goes on to discuss how Reconstruction turned on issues of continued relevance today.

"Fraternity", the third term in the French revolutionaries' motto, feels a little outdated, more than a shade sexist even, referring as it does to "the community of brothers" (and feminist scholars have not been slow to explain how it has justified patriarchy since 1789). And yet, I believe there is a precious kernel of meaning...

Explain why the early 21st century may represent a historical turning point in educational practice around the world and discusses how to create learning environments that will help all children take control of their own learning.

In the controversial public debate over modern American families, the vast changes in family life--the rise of single, two-paycheck, and same-sex parents--have often been blamed for declining morality and unhappy children. Drawing upon pioneering research with the children of the gender revolution, Kathleen Gerson reveals that it is not a lack of "family values," but rigid social and economic forces that make it difficult to have a vibrant and committed family and work life. Despite the entrance of women into the workforce and the blurring of once clearly defined gender boundaries, men and women live in a world where the demands of balancing parenting and work, autonomy and commitment, time and money are left

largely unresolved. Gerson finds that while an overwhelming majority of young men and women see an egalitarian balance within committed relationships as the ideal, today's social and economic realities remain based on conventional--and now obsolete--distinctions between breadwinning and caretaking. In this equity vacuum, men and women develop conflicting strategies, with women stressing self-reliance and men seeking a new traditionalism. With compassion for all perspectives, Gerson argues that whether one decides to give in to traditionally imbalanced relationships or to avoid marriage altogether, these approaches are second-best responses, not personal preferences or inherent attributes, and they will shift if new options can be created to help people achieve their egalitarian aspirations. The Unfinished Revolution offers clear recommendations for the kinds of workplace and community changes that would best bring about a more egalitarian family life--a new flexibility at work and at home that benefits families, encourages a thriving economy, and helps women and men integrate love and work. Praise for the Hardcover: "Over the past three decades, social change has blown apart the old-fashioned ideal of the nuclear family--and Gerson has set out to map where the pieces have landed." --New York Post "Valuable for the abundance and candor of the testimony from this unmoored generation pioneering through radically altered conceptions of personal and professional life." --Publishers Weekly "This is not a battle that can be won with legal challenges or legislation. Yes, it would undoubtedly be greatly aided by the passage of major social policies such as universal child care. But at its core, this is a fight that plays out within homes and between partners. And as Gerson's research makes clear, the fight has not changed all that dramatically in the past 30 years." --The American Prospect

The impact of the American Civil War on Karl Marx, and Karl Marx on America. Karl Marx and Abraham Lincoln exchanged letters at the end of the Civil War. Although they were divided by far more than the Atlantic Ocean, they agreed on the cause of "free labor" and the urgent need to end slavery. In his introduction, Robin Blackburn argues that Lincoln's response signaled the importance of the German American community and the role of the international communists in opposing European recognition of the Confederacy. The ideals of communism, voiced through the International Working Men's Association, attracted many thousands of supporters throughout the US, and helped spread the demand for an eight-hour day. Blackburn shows how the IWA in America--born out of the Civil War--sought to radicalize Lincoln's unfinished revolution and to advance the rights of labor, uniting black and white, men and women, native and foreign-born. The International contributed to a profound critique of the capitalist robber barons who enriched themselves during and after the war, and it inspired an extraordinary series of strikes and class struggles in the postwar decades. In addition to a range of key texts and letters by both Lincoln and Marx, this book includes articles from the radical New York-based journal Woodhull and Claflin's Weekly, an extract from Thomas Fortune's classic work on racism Black and White, Frederick Engels on the progress of US labor in the 1880s, and Lucy Parson's speech at the founding of the Industrial Workers of the World.

"It's a time of change in the world, with dictators toppling and new opportunities rising, but any revolution that doesn't create equality for women will be incomplete. The time has come to realize the full potential of half the world's population." --Christiane Amanpour, from the foreword The Unfinished Revolution tells the story of the global struggle to secure basic rights for women and girls, including in the Middle East where the Arab Spring raised high hopes, but the political revolutions are so far insufficient to guarantee progress. Around the world, women and girls are trafficked into forced labor and sex slavery, trapped in conflict zones where rape is a weapon of war, prevented from attending school, and kept from making deeply personal choices in their private lives, such as whom and when to marry. In many countries, women are second-class citizens by law. In others, religion and traditions block freedoms such as the right to work, study or access health care. Even in the United States, women who are victims of sexual violence often do not see their attackers brought to justice. More than 30 writers--Nobel Prize laureates, leading activists, top policymakers, and former victims--have contributed to this anthology. Drawing from their rich personal experiences, they tackle some of the toughest questions and offer bold new approaches to problems affecting hundreds of millions of women. This volume is indispensable reading, providing thoughtful analysis from a never-before assembled group of advocates. It shows that the fight for women's equality is far from over. As Leymah Gbowee, 2011 Nobel Peace Prize Laureate says, "Women are not free anywhere in this world until all women in the world are free."

Unfinished Revolution is the first study to gather nineteenth-century representations and performances of Haitian sovereignty in the Atlantic world. In assembling this undiscovered archive of black power, this book offers compelling evidence of the ways that sovereignty and blackness intersect with unstable processes of modernity to produce an articulation of black authority always, already under threat for eradication or ridicule. Undeterred, nineteenth-century Haitian leaders mounted a century's-long battle to situate Haiti at the centre of the Atlantic world.

In a world spiralling into a state of technological excess, Michael Dertouzos shows us how to make technology--in all its infinite varieties--work for, rather than against, us in our everyday business lives. Now includes a new foreword by Tim Berners-Lee, inventor of the World Wide Web. At its core, Dertouzos' manifesto is this: Simplify the use of technology to the point where it works FOR us rather than having it dictate the way we live and work. This book is about getting to the point where computer fads give way to a true Information Revolution. To get there, we must abandon our current preoccupation with machine complexities and set a goal that is as simple as it is powerful: Information technology should help people do more by doing less. Dertouzos offers a look at the future and place of technology in everyday life: Where would a world of truly easy to use technology lead the human race? How might people change their way of life and work, their politics, their self perception and their quest for the meaning of life in such an environment?

The Unfinished Revolution is a superb new biography of Sun Yat-sen, whose life, like the confusion of his time, is not easy to interpret. His political career was marked mostly by setbacks, yet he became a cult figure in China after his death. Today he is the only 20th-century Chinese leader to be widely revered on both sides of the Taiwan Strait. In contrast, many Western historians see little in his ideas or deeds to warrant such high esteem. This book presents the most balanced account of Sun to date, one that situates him within the historical events and intellectual climate of his time. Born in the shadow of the Opium War, the young Sun saw China repeatedly humiliated in clashes with foreign powers, resulting in the loss of territory and sovereignty. When his efforts to petition the decrepit Manchu court to institute reforms failed, Sun took to revolution. Sun traversed the globe to canvass support for his cause. A notable feature of the book is its coverage of the overseas Chinese in Southeast Asia and their contributions to his uprisings on the mainland, which set the stage for the overthrow of two millennia of imperial rule in 1911. But Sun's vision of China was not to be. Within a few years the republic was hijacked and plunged into chaos. This fascinating and immensely readable work illuminates the man and his achievements, his strengths and his weaknesses, revealing how he came to spearhead the revolution that would transform his country and yet, at his death in 1925 and still today, remain agonizingly unfinished.
