Industrial Revolution and involved the mechanization of production using water and steam power. Think water mills and steam engines.

Is Water 4.0 The Future? -
Water Online

The water industry is in a phase where it wants to get smarter. There have been recent steps towards a “digital water industry” being driven by political will. However, the concept of the smart water industry - or Water 4.0 - has to be driven from the bottom.

appeared in Berkeley
Engineer magazine, Spring
2014. Civil and
environmental engineering
professor David Sedlak's new
book, *Water 4.0: The Past,
Present and Future of the
World's Most Vital Resource*
(Yale University Press,
2014), calls for major
changes in urban water
systems. "If they want to
realize the full benefits of
conservation, water
utilities will have to
accept the idea that they
are no longer in the
business of selling water,"
says Sedlak.
