most dominant type of erosion? (1) deserts and beaches (2) deltas and floodplains (3) glaciers and moraines (4) mountain peaks and escarpments 2. Most sandstone bedrock is composed of sediment that was (1) sorted by size and not layered (2) sorted by size and layered (3) unsorted and not layered (4) unsorted and layered 5.

~~Weathering, Erosion and Deposition Multiple Choice~~  
Erosion is different from weathering since erosion has the moving element. The main driving force behind all agents of erosion is gravity. Without gravity the other major natural agents of erosion such as: wind, running water, glaciers, waves, and rain would not occur.
